FOR IMMEDIATE RELEASE

June 15, 2023

LAUNCH OF EUROPEAN FUNDING INSTRUMENT TO UPSCALE DIGITAL TWINS TOWARDS THE CITIVERSE THROUGH LIVING-IN.EU

Brussels, Belgium – The European Commission, together with 5 member states, announced the launch of the 'Local Digital Twin & Citiverse EDIC'. The European Digital Infrastructure Consortium (EDIC) is an instrument of the Commission Digital Decade Policy Programme 2030 and creates a vehicle for shared investments in knowledge & funding at European scale. This EDIC is led by Estonia and supported by Germany, Slovenia, Czech Republic and Spain. On the short term more Member States are expected to follow.

[Living-in.EU](#), the movement for the European way of Digital Transformation of cities and communities will support the EDIC in the actual deployment of Local Digital Twins and virtual worlds through 'the Citiverse' projects at local level. Through Living-in.EU cities, communities, regions and member states will have access to standardized and interoperable instruments to implement Local Digital Twins on local or regional level. The next step is to create the European alternative for the metaverse: the Citiverse. Based on European principles and values.

Today in the Digital Assembly 2023 taking place in Stockholm, the European Commission kickstarted leveraging tools such as the EDIC's. In her opening speech at the first Living-in.EU Mayor Digital Assembly Renate Nikolay, Deputy Director General in charge of Digital Policy at the European Commission, invited other Member States to join this EDIC. The first Digital Mayors Assembly taking place at the same time in Brussels echoed this message by showing support to the initiative. "I believe a multi-country project, supported by an EDIC will facilitate the large scale deployment of digital transformation we need in Europe; starting with Local Digital Twins." says Cristina Martinez, also representing the European Commission at the same event. "We can only do this by working together at all levels, the EDIC will enable us to do this, and Living-in.EU has an important role to play."

With the recent launches of new virtual reality hardware and virtual platforms to the consumer market, the development of the spatial web has accelerated. With the Digital Decade program the European Commission provides an answer to develop the digital transformation the European way. The development of the inclusive and community driven virtual worlds, via the citiverse, is this answer and will be delivered. But new ideas aren't innovations until you apply them.

Therefore living-in.EU and the development of the EDIC will create the conditions for success to accelerate the twin and just transition in Europe. By and for the citizens.

Project partners

EUROCITIES is the network of major European cities. The members are the elected local and municipal governments of major European cities. Their objective is to reinforce the important role that local governments should play in a multi-level governance structure. Eurocities aims to shape the opinions of Brussels stakeholders and ultimately shift the focus of EU legislation in a way which allows city governments to tackle strategic challenges at local level. eurocities.eu

OPEN & AGILE SMART CITIES

OPEN & AGILE SMART CITIES (OASC) is a non-profit, international smart city network that has the goal of creating and shaping the nascent global smart city data and services market. They are already today at the forefront of tomorrow's standards for city data, services, and technology –and we work based on city needs with support from industry. Unlike any other city network, OASC is driven by implementation and focused on open platforms and citizen engagement. <https://oascities.org>

The logo for the European Network of Living Labs is a bright yellow circle with a white speech bubble shape on its left side. Inside the circle, the text "European Network of Living Labs" is written in a bold, black, sans-serif font.

European
Network of
Living Labs

THE EUROPEAN NETWORK OF LIVING LABS (ENOLL) is the international federation of benchmarked Living Labs in Europe and worldwide. Founded in November 2006 under the auspices of the Finnish European Presidency, the network has grown in 'waves' up to this day. LLs operate as intermediaries among citizens, research organisations, companies, cities and regions for joint value co-creation, rapid prototyping or validation to scale up innovation and businesses. LLs have common elements but multiple different implementations. <https://enoll.org>

THE EUROPEAN COMMISSION helps to shape the EU's overall strategy, proposes new EU laws and policies, monitors their implementation and manages the EU budget. It also plays a significant role in supporting international development and delivering aid. <https://ec.europa.eu>

**European Committee
of the Regions**

THE EUROPEAN COMMITTEE OF THE REGIONS (COR) is the voice of regions and cities in the European Union (EU). It represents local and regional authorities across the European Union and advises on new laws that have an impact on regions and cities (70% of all EU legislation). <https://cor.europa.eu>
