Capacity Building Services

Offered by the European Network of Living Labs
Living Labs are open innovation ecosystems in real-life environments based on a systematic user co-creation approach that integrates research and innovation activities in communities, placing citizens at the centre of innovation.
Why should you choose our trainings?

As the only certification body and the largest international network of Living Labs, we take pride in being your ideal partner on this learning journey. Since 2006, we have been at the forefront of gathering and advancing knowledge materials and tips & tricks on Living Labs, offering a comprehensive insight into this evolving methodology. Your progress is our priority, and we are well-equipped to support and guide you every step of the way.

What sets us apart is not just our expertise, but also our global reach. Our accomplished trainers bring a wealth of experience in delivering impactful training sessions to Living Labs, companies, universities, public sector agencies and civil society organisations. We understand the nuances of developing Living Labs in various contexts and are committed to helping you unlock your full potential.

We understand that personalised and flexible learning is crucial in today’s fast-paced world. That is why our Capacity Building Programme offers a range of choices in digital or in-person formats.

You can immerse yourself in the world of Living Labs with our 10-week online course “Virtual Learning Lab”, designed to provide a comprehensive understanding of key concepts. If you are looking for an intensive, hands-on experience, our 1-day crash course the “Learning Lab - Day 0”, held in person, allows you to dive deep into the essentials.

For a more immersive exploration, consider joining a “Deep Dive” session into one of our 160+ global Living Labs. This option offers a unique opportunity to witness real-world innovation in action, fostering a deeper understanding of the Living Labs landscape.

Alternatively, we understand that your team’s specific needs may require a more tailored approach. That is why we offer the flexibility to create a personalized training session directly on your premises. Our goal is to ensure that our training options align seamlessly with your objectives, providing a learning experience that suits your team’s preferences and goal.

Expert training in a classroom, at a Living Lab, online or from your own premises!

VIRTUAL LEARNING LAB

Join us on a 10-week online journey with our Virtual Learning Lab, where each week introduces a new expert trainer delivering lessons on their specialized topic. This immersive experience is seamlessly connected through a unique canvas developed by the European Network of Living Labs, fostering a cohesive and interactive learning environment.

Designed to accommodate a diverse community of participants and experts, the Virtual Learning Lab serves as a dynamic platform for the exchange of knowledge. Through a case study approach, the course establishes a vital link between theory and practice, guiding participants through real-world applications of Living Lab concepts. The engaging format includes hands-on assignments crafted to empower participants to apply their acquired knowledge in specific contexts.

Offered in two editions annually, during Spring and Autumn, the Virtual Learning Lab provides a flexible and accessible opportunity to deepen your understanding of Living Labs.

COURSE FORMAT
Online, tailored sessions

DATES
Spring edition: 9 April to 11 June 2024
Autumn edition: 8 October to 10 December 2024

LEARNING LAB “DAY 0”

The Learning Lab also known as “Day 0” is a one-day training, taking place one day before the annual event of the European Network of Living Labs – the OpenLivingLab Days. The Learning Lab offers lectures and case study presentations connecting theory to practice, and hands-on exercises to support Living Lab newcomers and practitioners in applying learnings into their own specific contexts.

Whether you are new to the Living Lab ecosystem or a seasoned practitioner seeking to refine your approach, the Learning Lab is your gateway to a comprehensive and practical understanding of Living Lab methodologies. Join us on this prelude to the OpenLivingLab Days and equip yourself with the tools and insights needed to make a meaningful impact in the dynamic world of Living Labs. The Learning Lab has two tracks:

**BASIC TRACK**
Target audience: Developed for newcomers and learners from the local ecosystem of the OpenLivingLab days host city, Timisoara (Romania), interested in learning more about the key elements and operations of Living Labs.

**INTERMEDIATE TRACK**
Target audience: Ideal for practitioners with an intermediate level of knowledge of Living Labs who are interested in expanding their knowledge in co-design in Living Labs.

---

**COURSE FORMAT**
One day long intensive training in-person, group setting

**DATES**
24 September 2024

**LOCATION**
Timisoara, Romania

**TARGET AUDIENCE**
Ideal for groups of individual newcomers or intermediate learners benefiting from a one-day intensive group learning environment. Ideal for Learners from the OpenLivingLab Days host city with minimum or intermediate knowledge.

**COST IN 2024** *(The prices do not include VAT)*
Newcomers track 450 EUR / Intermediate track 550 EUR
Students: 200 EUR

DEEP DIVE SESSION

Embark on a transformative and hands-on learning adventure through our Deep Dive Sessions – thoughtfully crafted, intensive two-day workshops designed to immerse participants in the intricacies of Living Lab operations. What sets these sessions apart is the unique setting: each unfold within a distinct Living Lab, certified by ENOLL.

Our commitment to providing the most authentic experience ensures that your training is not confined to a traditional classroom setting. Instead, you will be actively engaged in the Living Lab’s daily operations, gaining insights directly from the professionals who navigate the challenges and successes of these innovative spaces. This immersive approach guarantees that your understanding goes beyond theory, allowing you to witness and participate in the real-world applications of Living Lab concepts.

**DEEP DIVE SESSION 1**
Topic: HOW TO USE FUTURE METHODOLOGIES AND FORESIGHT FOR OUR LIVING LAB
Location and date: Paris, France, 15 and 16 May 2024
Living Lab visited: La Fabrique du Futur and Universcience

**DEEP DIVE SESSION 2**
Topic: HOW TO USE ART AND ARTISTS TO ENHANCE ENGAGEMENT IN LIVING LABS
Location and date: Bristol, United Kingdom, November 2024
Living Lab visited: Knowle West Media Center – Bristol Living Lab

TAILOR-MADE TRAININGS

Our approach for the tailor-made trainings is centered on understanding your distinct needs, ensuring that the training we design is a perfect fit for your objectives.

In this type of training, we go beyond the one-size-fits-all approach. We collaborate closely with you to identify the specific areas where your organization can benefit the most from capacity building. Through a comprehensive needs assessment, we gain valuable insights into your challenges, strengths, and goals, allowing us to co-design a training program that addresses your organization’s individual requirements.

Whether you are aiming to enhance the skills of your team, streamline processes, or foster innovation within your organization, our Capacity Building Program is designed to empower you. We offer a diverse range of training modules, each carefully curated to provide practical insights and tools that align with your organizational context.

COURSE FORMAT
At your premises or online – depending on your preferences.

TARGET AUDIENCE
Ideal for organizations that need to train a team or focus on a specific focus area in their Living Lab.

TAILOR-MADE TRAINING

SETTING-UP A LIVING LAB

Crafted to empower your team on the journey towards establishing a thriving Living Lab, this comprehensive training encompasses a series of lessons, thoughtfully designed to provide participants with an understanding of the foundational principles and operational complexities of Living Labs.

Through a blend of engaging workshops, insightful case studies, and expert-led sessions, our training equips participants with practical skills and knowledge essential for setting-up a Living Lab. From mastering stakeholder engagement strategies to defining sustainable governance frameworks and innovative business models, each lesson is meticulously curated to address the multifaceted aspects of setting up and managing a Living Lab.

Moreover, our training program is not a one-size-fits-all approach. We understand that every team has unique requirements and objectives. Therefore, our sessions are flexible and adaptable, allowing us to tailor the content and delivery to suit the specific needs of your team. By collaborating closely with your organization, we ensure that the training experience is not only informative but also highly relevant and impactful, setting you on the path towards achieving your Living Lab aspirations with confidence and expertise.

TAILOR-MADE TRAINING

INTELLECTUAL PROPERTY in Living Labs

In this training, participants will immerse themselves in understanding the intricate principles and rules governing intellectual property (IP) within the dynamic environment of Living Labs.

Participants will explore fundamental concepts such as the role of Living Labs in fostering innovation and the significance of IP in the innovation process. Through interactive sessions, they will learn about various intellectual property rights, including patents, copyrights, trademarks, and trade secrets, and their application in collaborative settings. Best practices for sharing IP rights with stakeholders, establishing fair agreements, and balancing openness and protection in collaborative projects will be discussed, alongside real-life case studies highlighting successful IP management strategies.

Additionally, participants will delve into key IP issues in project development, addressing collaborative agreements within interdisciplinary teams and drafting IP guidelines tailored to different project stages. The training also covers the implementation of ideas/products in Living Labs, managing IP rights with external parties, and provides ample opportunity for participant engagement through Q&A sessions and peer discussions. By the end of the program, participants will be equipped with the knowledge and skills necessary for effective IP management within the dynamic environment of Living Labs.

Intermediate to expert learners. Ideal for Living Labs organizations seeking to deepen their understanding intellectual property management within the dynamic landscape of Living Labs.

COST IN 2024
Starting from 2,000 EUR per day (‘the prices do not include VAT’)
TAILOR-MADE TRAINING

WHY YOU SHOULDN’T OPEN a Living Lab
(but use an existing one)

In today’s fast-paced world of innovation, organizations are constantly seeking ways to collaborate, experiment, and test their ideas. Living Labs have emerged as powerful tools, offering real-world environments and user participation for research and development. This training program flips the script on traditional approaches. Instead of building your own Living Lab, we’ll show you how to leverage the vast potential of existing ones.

This comprehensive program equips participants with the knowledge and skills to find, engage with, and maximize the resources offered by existing Living Labs. You’ll learn how to identify the perfect Living Lab for your needs, establish successful partnerships, and leverage their expertise in user testing, data collection, and more. By the end, you’ll be equipped to embark on a transformative journey of innovation, all while saving time and resources by utilizing existing infrastructure.

TAILOR-MADE TRAINING

ENOLL TRAINING ON PROPOSAL WRITING

Living Labs are gaining momentum globally, with significant growth in the European policies and funding landscape. Living Labs play a pivotal role in EU initiatives being formally recognised as research infrastructure in the EU Research Area and are highlighted as flagship projects of the New European Innovation Agenda. Alongside, more than a quarter of the funding opportunities planned in the Horizon Europe Work-Programmes for 2023-2024 call for Living Labs or for the principles and methods they represent.

Expanding ENoLL value proposition, we are proud to introduce our latest offer exclusively for ENoLL members: a specialised training programme on Proposal Writing for Horizon Europe calls.

The programme is designed to help ENoLL certified Living Labs take advantage of these opportunities and play a pivotal role in the European research and innovation landscape.

Building on the long experience in EU funding and proposal development of ENoLL staff, ENoLL active Members will receive personalized guidance and insights across all the key steps and preparation needed to excel a proposal preparation.

MORE INFORMATION
